

NOVEL TRIMETHOXY-SILANES FOR SILICA GEL BONDING

NEW!

PETRARCH[®] Chemicals, manufactured by UCT Specialties announces the availability of several unique trimethoxysilanes. These materials can be bonded to the surface of silica gel particles in a similar manner to other methoxy silanes that are used to create traditional C18, cyano, or other phases seen in HPLC. Once bonded, these phases offer analysts unique chemistries for the retention and separation of a range of challenging compounds.
